Making the most of
mathematical talent

What the teachers said last year:

"Great to see maths out of
exam context."

"All the talks were informative
and entertaining."

"This has had more motivational
impact on my students than
anything I've seen in 30 years
of teaching."

Maths Inspiration

For Sixth formers and Year 11s

MATHS AND THE IMAGINATION

Colin Wright and **Rob Eastaway** will take you on a ride through mathematical topics that the curriculum rarely touches. Along the way, you'll encounter thought-provoking puzzles, the mathematics of juggling, games in which the audience can win money (but probably won't) and a discussion of some weird and wonderful theorems. Be prepared to have your imagination well and truly stretched.

There will be plenty of audience interaction, including a dynamic Question & Answer session at the end.

What the students said last year:

"I'm not a great mathematician, but I found the entire experience entertaining and intriguing."

"Is maths fun? No, it's hilarious."

Who's who?

Colin Wright graduated in Pure Mathematics at Monash University, Melbourne, before going on to get a PhD at Cambridge. While there he learned how to fire-breathe, unicycle and juggle. These days he is director of a company that specialises in software for marine radar, but takes time out to give juggling talks all over the world.

Rob Eastaway is an independent lecturer and author whose books on everyday maths include *Why do Buses Come in Threes?* and *How to Take a Penalty*. For several years he set puzzles for *New Scientist* and *The Sunday Times*, and he is often to be heard on radio talking about the maths of everyday life. He is also a keen cricketer.

Booking form: Exmouth

Please complete and return this form to:

Maths Inspiration, 18 Colwell Road, London SE22 8QP

I would like: Seats

No. of Student Seats: x £4 = £ (A)

No. of Free Adult Seats:
(1 adult seat free for every 10 pupils)

No. of Paying Adult Seats: x £4 = £ (B)
(eg 25 pupils with 4 adults means 2 paying adults)

I enclose a cheque made payable to
'Maths Inspiration' for £ (A + B)
